3.2.2 GEFEG.FX - The Software for the Integration Architect

GEFEG.FX provides professional and comprehensive support in the development, documentation and testing of data formats for the electronic exchange of business documents.

GEFEG.FX aims at high data quality already in the planning phase of data exchange and beyond that at shortening the implementation phase. To achieve these goals, GEFEG.FX relies on international standards, supports the specification of standards and mappings, and standardizes and simplifies routine tasks. At the push of a button, meaningful documentation is generated - for publication on the Internet or for forwarding to business partners. Last but not least, extensive testing options support the data quality: error-free interfaces even before the start of productive use save time and money.

The ideal messages of GS1 Switzerland are also created and maintained with GEFEG.FX. A starter offer is available from as little as CHF 2,000.

Please contact systemberatung@gs1.ch or 058 800 72 00.

GS1 Switzerland - The Global Language of Business

GS1 Switzerland provides solutions for more efficient value networks using global standards. We help companies optimise the flow of goods, information and value and share practical knowledge with them. Together with our members, we devise standards and process recommendations and create benefits for everyone involved.

GS1 Switzerland is a neutral association based in Bern and forms part of GS1, a not-for-profit organisation active in 140 countries.
